On the Web

After you have [Font Awesome set up in your web project](#), you can copy any icon's name here and paste it into our [standard markup](#). Using [CSS pseudo-elements](#)? Copy and paste the unicode value into your specific CSS rule.

On the Desktop

After you have [Font Awesome set up on the desktop](#), you can copy any icon's name here and paste it into a text field and let [ligatures](#) do the rest of the work (when supported by your desktop app). Or you can also copy and paste the icon (not the unicode) directly from this page into a text layer as a [glyph](#).
